

CAPABILITY STATEMENT

kenworthydiesel.com.au

COMPREHENSIVE MAINTENANCE AND HIRE SOLUTIONS

Kenworthy Diesel provides complete mechanical, engineering, labour and equipment solutions across Western Australia. From workshop rebuilds and field service callouts to labour hire, plant hire, and heavy haulage, we deliver dependable support that keeps projects running efficiently in every region.

Our integrated model combines maintenance, fabrication, transport and workforce capability under one roof.

Backed by modern facilities, late-model mine-spec vehicles and a team of highly skilled tradespeople. Whether establishing remote workshops, mobilising skilled site crews, or managing fleet repairs, Kenworthy Diesel offers a single, trusted source for safe, cost-effective, and performance-driven outcomes across mining, civil, and construction sectors.

WORKSHOP

Kenworthy Diesel's fully equipped Forrestdale workshop provides complete repair and maintenance solutions for heavy diesel mining and construction equipment, from diagnostics to full machine rebuilds. Our transparent, innovative approach ensures cost effective, timely repairs with practical solutions that minimise downtime and maximise value.

- Comprehensive workshop services including diagnostics, component rebuilds, inspections, and mine-spec fitouts.
- Repair methods that prioritise efficiency and reduced downtime over part replacement.

PLANT HIRE

Kenworthy Diesel supplies late model, mine-spec plant and equipment for hire across WA's civil and mining sectors, offering both short and long term options to meet project demands. Supported by our inhouse Field Service and Workshop teams, our Dry and Maintained Hire solutions ensure your equipment remains reliable, compliant, and cost effective throughout the hire period.

- Extensive fleet including loaders, excavators, dozers, graders, trucks, and ancillaries.
- Flexible Dry and Maintained Hire models to suit your site's capacity and project requirements.
- Fully compliant for seamless mobilisation.

FIELD SERVICE

Kenworthy Diesel provides fast, reliable field service repairs and heavy equipment maintenance across Western Australia, minimising downtime and keeping your fleet running efficiently. Our skilled team, equipped with mine-spec vehicles and advanced diagnostics, delivers expert on-site solutions across all major equipment brands.

- Fully equipped mine-spec service vehicles with advanced diagnostic and specialty tooling for rapid response.
- Expertise across all major OEMs and equipment types: from dozers and dump trucks to service vehicles and loaders.

SITE SUPPORT

Kenworthy Diesel supplies skilled site personnel to keep your projects running smoothly, offering flexible short or long term support tailored to your operational needs. From supervisors to trades and service crews, we deliver reliable labour solutions that align with your site, roster, and budget requirements.

- Full coverage for maintenance roles including supervisors, planners, fitters, boilermakers, and auto electricians.
- Flexible FIFO/DIDO arrangements with or without vehicles and tooling, tailored to your project demands.

HEAVY HAULAGE

Kenworthy Diesel delivers safe, reliable heavy haulage solutions for transporting equipment across WA, supporting everything from general machinery moves to workshop repairs and project logistics. Our versatile fleet provides end-to-end transport to complement our maintenance and plant hire operations for a seamless, cost effective experience.

- Comprehensive heavy equipment transport across WA, including collection and delivery.
- Integrated haulage support for clients using our maintenance and plant hire services.
- Diverse float fleet enabling flexible and efficient heavy haulage solutions.

ENGINEERING

Martin Engineering, a wholly owned subsidiary of Kenworthy Diesel, delivers specialised on-site and workshop based engineering solutions for the mining, civil, and construction sectors across WA. With expertise in line boring, cutting, welding, and fabrication, they provide high quality workmanship that enhances equipment performance & longevity.

- Specialists in precision line boring, welding, cutting, and complex fabrication.
- Capable of handling urgent repairs, planned maintenance, and full scale project work.
- Equipped with advanced tooling and industry experience to deliver reliable, high performance outcomes.

REMOTE WORKSHOP

Kenworthy Diesel on-site workshops offer end-to-end maintenance management solutions. From setup and staffing to procurement, planning & supervision, no matter how remote the location - ensuring your operations stay productive and efficient.

- Complete turnkey remote workshop solutions.
- Integrated planning, procurement & supervision.
- A passionate, solutions driven team.

REWARDING RELATIONSHIPS

Kenworthy is proud to partner with major clients and regions throughout Western Australia and beyond. Our longstanding relationships reflect our continued commitment to delivering maximum value at every opportunity.
